Suite of Disaster Plan and Emergency Preparedness Products

Emergency Medical Record

If you had a medical emergency, wouldn't you want emergency responders to have the best equipment available to save your life? Why not the best technology?

Medical Records
for: **Sample, Joe**
can be accessed at the web-site:
www.Health-Records.net
User Name: **demo2**
PIN: **9999**
or from your cell phone:
www.Health-Records.mobi

In a medical emergency, emergency responders can use the medical ID card printed from ICER-2-GO to access medical records online from either a computer or from a cell phone. This gives emergency responders immediate access to life-saving medical information. Every member of your family benefits from having an online medical record.

For non-emergency situations, a complete medical report can be made available to a family doctor or to a specialist.

“As an emergency room doctor, I love this medical record. It is exactly the kind of information I need to initiate comprehensive medical care.”

I wish everyone had this medical record available – it would make my job so much easier – and more effective.” Roy Givens, M.D.

Three parts of the ICER-2-GO™ disaster plan:

1. **Emergency Medical Record** -- Online medical records for emergency medical situations or for ongoing health care visits
2. **Keep My Child Safe** software -- organizes activities in the child's life and provides instant access to a missing child report if needed
3. **Protect My Assets** software -- stores copies of financial or legal documents in the event of a natural or manmade disaster

Keep My Child Safe

In a missing child emergency, law enforcement officers can access the child's safety record from Keep My Child Safe Software to launch an immediate missing person investigation. The child safety report is available on the Internet or on a cell phone just like the medical record. To give law enforcement officers access, the parent has to furnish the username and pin

number just like the medical ID card. In this case, police departments throughout the nation can bring up the information on their computers. In addition, officers sitting in their police cruisers can view the child's information on a cell phone.

ICER-2-GO features the only software available that gives emergency responders and law enforcement agencies immediate access to information necessary to resolve a medical emergency or missing person emergency.

Protect My Assets

If your financial records were destroyed in a flood or fire, could you easily re-create them? If you needed pictures of your tangible assets to prove an insurance loss, do you have them available? If your credit cards were stolen, do you have the tollfree numbers needed to cancel them?

Should something happen to you, does your family know where to find a copy of your will, power of attorney, life insurance policies and other legal documents? Do you have copies of important documents stored in a safe place? With ICER-2-GO™, you can store copies of birth certificates, passports, immunization records, property deeds, wills, power of attorney or any document that you need to protect.

ICER-2-GO™ provides password-protected, 256 bit AES encrypted financial records. If you needed to rebuild your financial data from scratch, ICER-2-GO™ provides that capability. Because your data is stored securely, no one can access it without your permission. ICER-2-GO™ is your online safety deposit box!
